

Lab 1: ER Diagrams

SC2207 Introduction to Databases

Dr. W. K. Ng

January 31, 2023

Team 1

Full Name	Individual Contribution to Lab 1 Submission	Percentage of Contribution	Signature
Anusree Sreekumar	Analyse viability of ER diagram using potential queries + propose relevant edits	14.3%	
Aruna D/O Vadivelu	Construction of multiple components in ER diagram	14.3%	
Ho Wei Hao	Group Leader Directed the logic of the ER diagram	14.3%	
Kevin Yok	Helped to prepare part of the ER diagram	14.3%	
Liv Tan Ker Jin	Proposed relevant edits required to allow for smooth logical flow of the ER diagram, questioned feasibility of diagram	14.3%	
Ng Si En	Helped with the development of different aspects of ER diagrams and answered queries raised by group members	14.3%	
Shi Xinyu	Rectified relationships between the attributes and entities	14.3%	

Assumptions

1. Rating is on the publication instead of the publication in the bookstore.
“After a customer purchases a publication, he/she is allowed to rate and comment on the publication once”
2. Difference between Publications & Publications in bookstores -- made use of ISBN (The International Standard Book Number) for publications. This is understood to be distinct from the publication ID given by individual bookstores to the publications they sell (unique within bookstore, but not necessarily unique across bookstores)
3. The points on order status and complaint status are not reflected in detail as they are assumed to be updated automatically via interactions on the customer/bookstore/courier/Ahamazon's end
4. Price does not fluctuate in a day.
5. Only the latest rating or comment of a particular customer for a particular publication is relevant.
